Hiring Team,
BruntWork.
 Dear Hiring Team,

RE: Application for Framer/Webflow Web Developer (Remote – Contract Position)

I am writing to express my keen interest in the Framer/Webflow Web Developer position recently listed at BruntWork. As a second-year Computer Science student at Uganda Martyrs University with hands-on experience in data management and a growing background in web technologies, I am excited about the opportunity to contribute to your client's multi-channel digital content operations.

During my internships at Hima Cement Ltd, I was responsible for accurate data entry and coordination during stock-taking periods roles that demanded precision, consistency, and strong time management. These experiences, along with my academic focus on coding and networking, have shaped my attention to detail and technical adaptability qualities that align well with the requirements of this role.

While I currently specialize in WordPress-based content management, I am highly motivated to expand my expertise into more advanced platforms like Framer and Webflow. I am a quick learner, familiar with content structuring, and confident in my ability to schedule and manage content across social media and email channels. Additionally, I hold a Cisco Networking certification and am eager to grow within a globally distributed, fast-moving team like yours.

I am particularly drawn to BruntWork's commitment to innovation and efficiency in digital marketing execution. The prospect of working remotely while contributing to a forward-thinking digital business aligns perfectly with my current goals and academic progression.

Thank you for considering my application. I am ready to begin immediately, and I look forward to the opportunity to contribute value to your team while continuing to learn and evolve professionally.

Yours sincerely,
Mwebesa Johnson
